

# Transforming Care Through the Involvement of Patients and the Public: Learning from Experts by Experience in the Psychological Professions Network.

The North West PPN Expert by Experience (EbE) representation steering group facilitated a webinar recently for Health Education England.

The webinar set out the national context for EbE involvement in health and care organisations, and shared some results from a regional survey exploring EbE involvement in the training of psychological professionals. The NW PPN steering group shared their own stories of involvement with various agencies across health and education settings, setting out the various pillars of involvement and associated examples of good practice.

You can access the recording from our webpage which gives further details and blog updates about our projects going forwards: [Experts by Experience Involvement in Psychological Professions Training \(nwppn.nhs.uk\)](https://nwppn.nhs.uk/experts-by-experience-involvement-in-psychological-professions-training)
