

MSc Psychological Therapies Practice and Research

This programme has been developed to enable you extend your PGDip into an MSc by undertaking a piece of empirical research, service evaluation, quality improvement project or a systematic review. The research thesis will allow you to follow your research interests in a topic related to your clinical area or a project related to service-based development. Supervision is provided by clinical researchers and/or psychological therapies/practice subject experts with provision available to support project supervision over Zoom or Teams to improve access to the programme.

Why Exeter?

- A contemporary MSc from a Russell Group university
- Online delivery, allowing for individual and group working in any location
- A programme designed by a team of leading academics and practitioners to optimise the student's research and evaluation learning and work.
